

EMULSIONANTE PARA ACONDICIONADOR

VEGANO

SUBJECT: INFORMATION FOR VEGAN ASSESMENT

Vegan requirements are defined primarily for foodstuffs.

For cosmetic ingredients there are no regulations or guidelines which contain a definition of “vegan”.

Due to the absence of regulations and/or guidelines it is up to the cosmetic company to decide whether a cosmetic ingredient is in line with their policy on “vegan”. The following criteria are often deemed to be relevant:

Non-animal:

The manufacture and development of **EMULSIONANTE** does not and has not involved the use of any animal product, by-product or derivative. **Gran Velada.S.L** strives diligently to minimize cross-contamination from animal substances used in other (non-vegan) products as far as is reasonably practicable.

Non-animal is understood as not derived from non-human vertebrates (birds, mammals, amphibians, reptiles, fish) or from derivatives of living animals for example lanolin, bees, wax, keratin, eggs, dairy products, silk proteins.

Non-animal testing:

No animal testing has been carried out by or on behalf of **Gran Velada.S.L** on the product in question after 11 th March 2009 for the purposes of the European Cosmetics Regulation.

Non GM:

To the best knowledge the product **EMULSIONANTE** is not known to contain genetically modified organisms (GMOs) that include animal genes.
