SODIUM COCO-SULFATE

NATURAL ORGANIC CONTENT

EU Substances of Very High Concern (SVHC)

According to Article 33(1) of 1907/2006/EC (REACH), Sodium Coco-Sulfate does not contain any SVHC substances (Substances of Very High Concern) listed on the latest candidate list in concentrations exceeding 0.1%.

Endocrine Disruptors

Sodium Coco- Sulfate does not intentionally include any of the 66 endocrine disruptors identified in Annex 15 of EUROPEAN COMMISSION DG ENV 'Towards the establishment of a priority list of substances' for further evaluation of their role in endocrine disruption.

Supplier's Declaration of Conformity According to ISO 16128-2:2017

The active ingredient(s) in Sodium Coco-Sulfate contains more than 50% renewable carbons, therefore it meets the ISO 16128:2017-2 standard for natural and organic cosmetic ingredients and products.

Renewable Carbon Index (RCI) %	Natural Index	Natural Origin Index	Organic Index	Organic Origin Index	Category of final ingredient
100	0	1	0	0	Derived Natural

Pesticide Residues

Sodium Coco-Sulfate is not a plant extract. While derived from raw materials of natural origin, extensive physical and chemical processes are involved to convert the raw material to the finished product and it is not expected that any pesticide residues will remain intact.
